## WORK EXPERIENCE

### ADIDAS
Bogotá
May 2021 - Jun 2025

**SOFTWARE ENGINEER**

- Led the development of **customization modules** (frontend and 3D) for sportswear's PDP using **Three.js** and **Unity**, enhancing user engagement and its end-to-end testing with **Jest** and **Cypress**.
- Improved reliability and deployment speed of the adidas Checkout **backend** microservice by implementing CI/CD pipelines and infrastructure automation via **Jenkins**, **Kubernetes**, and **Grafana**, supporting daily transactions across **30+ countries**.
- Developed and maintained scalable frontend components using **ReactJS** and **Redux** for the Global Team Sports platform, contributing to a personalized user experience for **20+ international markets**.
- Contributed to the front-end architecture of the **Yeezy e-commerce portal**, acclaimed for its minimalist design and **functional programming in Typescript**, resulting in a faster load time.

### MADBRICKS
Remote
Sep 2020 - Dec 2020

**GAME DEVELOPER**

- Developed and maintained hyper-casual mobile games using **Unity** and **Unreal/C++**, enhancing user engagement and UI/UX experience.

### UMBRA INTERACTIVE - 3D STUDIO
Bogotá
Jan 2020 - Sep 2020

**FRONTEND SOFTWARE DEVELOPER**

- Created **immersive 3D applications** with **React** and **Unreal/C++** and interactive masterplan visualisations for the real estate sector (PropTech)
- Developed hyper-casual games in **Unity** and **Virtual Reality** to support brand marketing campaigns and mall activations, engaging audiences through interactive gameplay.
